MEN AND PRODUCTS SERVICING THE MARKET

Walmec and the market, an association that has lasted for almost seventy years since, in 1945, a resourceful craftsman marked history with a painting system that is still the foundation of our rich catalogue; an association made up of dialogues, meetings, innovations and, above all, the will to grow together, Walmec and the market.

New products and more: reliability, quality and service; because being on the market not only means listening and meeting new demands, but also the ability to offer innovation at the right conditions, at the right time, with the required features and expected quality.

Service and quality, reliability and dynamics, the “mission” that drives Walmec; “mission” that the entire organisation industriously and daily strives to fulfil for the sole purpose of maintaining the market leadership the company has always enjoyed over all these years.

UNI EN ISO 9001:2008 quality certification, which has accompanied Walmec in this journey in the compressed air world since 1996, summarised the professionalism and sincerity with which the company and its employees work each day: designing and manufacturing its products in the S. Lucia di Piave (TV) and Calcio (BG) facilities, thus offering the market a strictly MADE IN ITALY range of products.

For us, manufacturing in Italy means protecting a know-how that belongs to these brands, to these workers, to this market since 1945.

Quality, reliability, service, capacity, reactivity: indispensable values, values rooted in our land, values that we proudly convey each day to all those who, with their trust, know how to appreciate them.

Behind this catalogue is tradition, innovation, self-sacrifice and determination; there’s the determination of a company to demonstrate that sincerity is worth more than a discount; there’s the pride of over 100 people working for the market.

Walmec S.p.A. is UNI EN ISO 9001:2008 certified with certificate nr. 343/96/S.

NOVEMILA Top Line series

A wide range of professional spray guns including HVLP, HTE and Special Series systems.

The HVLP version, enhanced and enriched by the new high pulverising "TOP HVLP" cap, offers high performance in terms of fan and atomization while still maintaining the HVLP work parameters (0,7 bar output at cap, transfer efficiency > 65%). Equipped with a pressure regulator and pressure gauge for correct spray gun use according to regulatory standards.

The reduced air consumption, just over 200 l/min, combined with 25% higher savings than more traditional systems, make this spray gun one of the most popular and appreciated on the market.

The HTE version, equipped with a new highly pulverising "TOP HTE" cap, still working at pressures higher than the HVLP system, maintains the reduced air consumption and high transfer efficiency features.

Furthermore, the new cap improves fan and product atomization performance.

The versatility of this spray gun allows for its use in various sectors where a high level of paint product atomization is required.

The product passage made of stainless steel allows for the use of water-based paints, increasingly more popular on the market.

The range also includes a series of spray guns dedicated to Special applications for use in various and critical sectors: from construction to furniture manufacture, from woodworks to the nautical sector.

Glue, mural paints, Gel-coat tixotropic products are just some examples of products that can be applied with these spray guns.

PACKAGING

All spray guns of the Novemila series are supplied in handy rigid plastic suitcases containing all the accessories for a correct cleaning and maintenance.

9011 HVLP (with 680 cc nylon tank) - Ref. 210**

Body: chemical nickel-plated polished aluminium
TOP HVLP Cap: chemical nickel-plated brass
Needle-spring-nozzle: stainless steel
Adjustments: air-product-fan
Weight: 940 g

Working pressure: 2,0 bar
Air consumption: 220 l/min.
Nozzle Ø: 1,3 - 1,5 - 1,7 - 1,9 - 2,2 - 2,5

Air inlet pressure regulator with pressure gauge

Recommended use:

9010 HTE Ref. 236**

Bayonet suction cup: aluminium 1000 cc
Body: chemical nickel-plated polished aluminium
TOP HTE Cap: chemical nickel-plated brass
Needle-spring-nozzle: stainless steel
Adjustments: air-product-fan
Weight: 920 g

Working pressure: 2,5 - 3,0 bar
Air consumption: 220 - 240 l/min.
Nozzle Ø: 1,3 - 1,5 - 1,7 - 1,9 - 2,2 - 2,5

NOTE:
add nozzle Ø to Ref. (**)

Recommended use:

9010/SP HTE Ref. 237**

To be used through pressurized containers, low pressure pumps - Product inlet M1/4"
Body: chemical nickel-plated polished aluminium
TOP HTE Cap: chemical nickel-plated brass
Needle-spring-nozzle: stainless steel
Adjustments: air-product-fan
Weight: 590 g

Working pressure: 2,5 - 3,0 bar
Air consumption: 220 - 240 l/min.
Nozzle Ø: 1,0 - 1,3 - 1,5 - 1,7 - 1,9 - 2,2 - 2,5

NOTE:
add nozzle Ø to Ref. (**)

Recommended use:

9010 ECOMIX

Ref. 250**

Adjustable suction pressure bayonet tank: 1000 cc stainless steel
Body: chemically nickel plated polished aluminium
Cap: chemically nicked brass
Needle-nozzle-springs: stainless steel
Adjustments: air-product-fan
Cup gasket: o-ring in EPDM
Use: application of wall paints in the building sector
Weight: 940 g

Working pressure: 2,5 - 3,0 bar
Air consumption: 200 - 240 l/min.
Nozzle Ø: 2,2 - 2,5 - 3,0

Equipped with regulator group of the air inlet flow and air pressure to the tank

NOTE:
add nozzle Ø to Ref. (**)

Recommended use:

9010/SP ECOMIX

Ref. 251**

To be used through pressurized containers, low pressure pumps - Product inlet M1/4"
Body: chemically nickel plated polished aluminium
Cap: chemically nicked brass
Needle-nozzle-springs: stainless steel
Adjustments: air-product-fan
Use: application of wall paints in the building sector
Weight: 610 g

Working pressure: 2,5 - 3,0 bar
Air consumption: 200 - 240 l/min.
Nozzle Ø: 2,2 - 2,5 - 3,0

NOTE:
add nozzle Ø to Ref. (**)

Recommended use:

9011 HD

(with 680 cc nylon tank) - Ref. 233**

Pressurised gravity tank (M 1/4" product inlet): for high density products such as latex, polyurethane, gel coat, tixotropic products in the wood and industrial sectors
Body: chemically nickel plated polished aluminium
Cap: chemically nicked brass
Needle-nozzle-springs: stainless steel
Adjustments: air-product-fan
Weight: 1,25 Kg

Working pressure: 2,5 - 3,0 bar
Air consumption: 220 - 240 l/min.
Nozzle Ø: 1,5 - 1,9 - 2,2 - 2,5

Double spray gun air inlet pressure regulator and pressurised tank with pressure gauge

NOTE:
add nozzle Ø to Ref. (**)

Recommended use:

9010/SP COLLA

Ref. 253**

To be used through pressurized containers, low pressure pumps - Product inlet M1/4"
Body: chemically nickel plated polished aluminium
Cap: chemically nicked brass
Needle-nozzle-springs: stainless steel
Adjustments: product-fan
Nozzle Ø: 590 g

Working pressure: 2,5 - 3,0 bar
Air consumption: 180 - 240 l/min.
Nozzle Ø: 1,7 - 1,9

NOTE:
add nozzle Ø to Ref. (**)

Recommended use:

9011 GEL COAT

Ref. 255**

Tank: nylon 680 cc
 Body: chemical nickel-plated polished aluminium
 Cap: chemical nickel-plated brass
 Needle-spring-nozzle: stainless steel
 Adjustments: air-product-fan
 Use: for application of Gel Coat and dense products generally
 Weight: 810 g

Working pressure: 2,5 - 3,0 bar
 Air consumption: 180 - 220 l/min.
 Nozzle Ø: 3,0 - 4,0 - 5,0

NOTE:
 add nozzle Ø to Ref. (**)

Recommended use:

SEIMILA series

The new line of high performance spray guns in terms of both fan and atomization and durability and reliability. Manufactured with all of Asturomec®'s experience as a guarantee, they are the maximum expression of an ideal spray gun for all sectors that require quality paint results associated with efficiency.

From bodyworks to woodworks, industry and crafts, the new SEIMILA series was specifically designed to fully enhance the operator's work.

Available in the HVLP version (0,7 bar at cap; transfer efficiency > 65%) and HTE version, this spray gun comes with a highly pulverising HT cap and is built to resist aggression from all types of solvents.

The lack of gaskets, thanks to high precision mechanical processing, guarantees that highly desired durability appreciated by operators in the various reference sectors.

OM-IM-UR PLUS series

Spray guns designed to combine reliability, versatility and price. Their strength has made them the market leaders since their launch in the 50s. But the strength of a product can be seen by the way it develops, so, in 1999, the HVLP version of the OM was created to meet the needs of the most sensitive markets in terms of product saving and environmental regulations.

The professional IM/OM version originated the creation of the UR PLUS version, with brass components which, considering the quality/price ratio, makes the product also suitable for D.I.Y.

GRAPHIC series

Mini high-precision professional spray guns for applications on small surfaces.

The easy application and lightness of these spray guns make them ideal, besides for the industry also for body shops, woodworking.

Thanks to the high quality level this spray gun is also suitable for professional decorators and D.I.Y.

Available with a number of different sized cups according to the specific application.

The new RE version was designed to meet the ever-growing demands of the DIY market, combining the advantages of a quality mini spray gun with an undoubtedly competitive price.

SPECIAL series

G1 SERIES: Spray guns indicated for the application of high density products to obtain a high finish orange peel or sponge effect.

Recommended in all those sectors where a normal spray guns does not provide sufficient yield in spraying these products.

The stainless steel cup and NBR gaskets features make this product resistant to the most aggressive solvents and most improper maintenance.

The new regulator also guarantees constant cup pressure.

RD SERIES: Spray gun specific for the application of paint or rust-proofing products on hard to reach areas (such as radiators).

EPD SERIES: Pressurised air brush for dense products without atomisation air.

Ideal for glue, sealing and lubricants.

The special "flat or long spout" rods permit precise and efficient applications according to specific needs.

MM: Spray gun specific for plastic wall application.

painting ACCESSORIES

Professional accessories designed to facility bodyworks, guaranteeing maximum efficiency and practicality, demonstrating that even details are important in quality works. A complete ranges, from regulators to masks, clothing to Personal Protection Equipment, specific paint booth hoses and paint filters. All this designed and manufactured by Walmec exclusively for professionals.

PAPER SIEVE

Practical, efficient, disposable sieve for correct paint filtering.

MASK

Complete with helmet, visor and internal air regulator; required for workman's safety in the paint booth.

GOGGLES

Light weight and ergonomic, they guarantee maximum safety during work.

MASKS

Active carbon or dust-proof, they offer suitable respiratory tract protection.

SKELETON

Spray gun bench stand with upper tank.

OVERALLS

Made of Nylon with an anti-static finish, it is the solution required to work in the paint booth. The anti-static finish makes it paint fume repellent.

GLOVES

Made of latex, paint and solvent resistant, they let the operator work in fully clean conditions.

Regulator

Ref. 90105

Air flow regulator with glass pressure gauge and metallic case to be applied to the spray gun air inlet
Pressure gauge: scale 0 - 10 bar
Air inlet: 1/4" U compatible with various standard 1/4"

Package: 1 pcs
Weight: 150 g

PRESSURIZED CONTAINERS and LOW PRESSURE PUMP

Ideal for the use of large amounts of product, suggested for wood industry, carpentry, industrial painting, for the application of vinyl and neoprene glues, tar, abrasive pastes and liquids.

Considering the dimensions the product can be poured directly into the tank or placed inside its own container to avoid cleaning. No special maintenance requirements.

A 30 l/min. low pressure pump has been added to the range in order to facilitate work on large surfaces, ideal for any type of use.

BLOW GUNS

Designed and constructed for professional use, they are divided into 4 macro groups: PROFI series, PA/4N series, SOFT series and the new, captivating and modern PA/6 series.

Always functional and reliable, they now also meet the more demanding customer's needs with versions enhanced by the modern and innovative design.

The new PA/6 is a demonstration, combining functional quality with a unique design made possible by the grip's soft-touch rubber overprinting.

The wide range of available nozzles make Asturomec® blow guns flexible and suited for more specific use.

The entire series is equipped with progressive distribution valve.

PROGRESSIVE VALVE

The distinguishing element in our blow guns, they accurately and reliably dose the amount of air to be used.

PA/6

Nickel-plated body with soft-touch rubber overprinting for a sure and comfortable grip. One of a kind, the PA/6 represents Asturomec's future.

INFLATING GUNS

Accurate and reliable, they have always been a measurement instrument selected and appreciated by the most demanding professionals and DIY lovers.

From the legendary PG/S to the brand new PG/PRO, the result of years of technical, functional and aesthetic research associated with decades of experience in this sector, the Asturomec inflation gun range is the most complete and professional range on the market.

Precision instruments with top quality pressure gauges, equipped with FAIL SAFE GAUGE SAFETY VALVE that prevents gauge needle oscillations during use, cutting it off from the air line during inflation.

Available in the CEE/OM version, meeting EEC D96 18.08.02 nr. 71/316 directive standards for pressure gauges and gun (check First).

General sales conditions

Validity

The following standardised general sales conditions govern the sales agreements, and are integral part of our agreements even when orders are collected by fax, by phone, by e-mail, via internet or verbally.

The provisions, the conditions and any other incidental contractual negotiations, in the case they depart from these general conditions, must be stated and accepted in written, otherwise they will be invalid and without effectiveness.

This catalogue cancels and replaces the previous ones and it may be changed at any time without notice and without this entails any right by the Customers to receive compensation.

Offers and Finalisation of the Contract

Technical descriptions and pictures are reported purely as an indication of the characteristic of the Product, but they are not in themselves promises or essential quality of the supplied Products and therefore they may be changed at any time up to the finalisation of the contract. Requests for quotations (Offers) are not in any case a "confirmed sales order". Further to said requests, Walmec S.p.A. will proceed exclusively in order to provide the required information.

Offers made by Walmec S.p.A. are not binding for the seller. The order made by the customer is binding and irrevocable according to article 1329 Italian Civil Code and for a period of 8 (eight) days after its receipt. Walmec S.p.A. has the right to accept the order either by written confirmation or by starting the execution of the contract, by shipping the ordered Products. The contract is believed to be finalised at Walmec S.p.A.'s commercial offices, via Trieste 10, Santa Lucia di Piave, Treviso, Italy. All orders transmitted are always to be considered "subject to approval" by Walmec S.p.A.

Orders for a total value lower than EUR 500.00 (five-hundred/00) are not accepted, except in the case of orders made solely for spare parts which will only be despatched on cash in advance with carried prepaid.

Prices and Terms of Payment

Unless otherwise written agreement entered by the Parties, Walmec S.p.A. applies to the finalised contract prices quoted on its catalogues and on its price lists effective at the time of the receiving of the order. Prices are quoted net of V.A.T. due according to the Italian Law in force.

Title of Products sold is of Walmec S.p.A. until the full and total payment, and any down payment made will be retained as reimbursement of damages and expenses.

Invoices issued by Walmec S.p.A. must be settled within the written terms agreed by the Parties, at the creditor's domicile, according to Article 1182 Italian Civil Code, even if the payment is made by bill of exchange or cash order.

Being expired the stated payment term, Walmec S.p.A. is authorised to draw a bill without any notice.

In case of late payment beyond the terms agreed and specified on the invoice, interest will be charged and it will be equal to the legal interest rate increased by seven points and related expenses.

In case of late payment Walmec S.p.A. has the right to require the fulfilment of any pending order by asking either advance payment or cash on delivery.

Freight charges will be accrued on the invoice except different agreement by the Parties. Packaging is billed at cost and it is not accepted in return.

Delivery Terms

Walmec S.p.A., in case of orders of remarkable quantity, has the option to make partial delivery.

Delivery terms are never binding; a possible missed delivery either fully or partially, or a simple delay, does not constitute right to recover any damage unless it was explicitly agreed in written form and accepted by the Parties.

In case the Parties have written agreed the Customer will make a down payment, the delivery term starts from the receipt of the agreed sum.

Shipping Risks

Products are shipped with all the risks in charge of the Customer, even if the Products are sold free domicile. Unless otherwise agreed by the Parties in written form, Walmec S.p.A. ships the Products to the address indicated by the Customers.

If the shipment is delayed because of reasons attributable to the customer, the risk in the title or for deterioration of the Products is in charge of the customer starting from the day when Walmec S.p.A. informs the customer to be ready to the shipment of the Products.

In all cases of force-majeure events, such as strikes, stoppage of transport, etc., Walmec S.p.A. will be exempted by its duty concerning the shipment, whereas such events could not be claimed by the customer as reason to annul the order.

Walmec S.p.A. will not bear any responsibility for any possible shortage of materials or damages of the parcels due to shipment made using parcels or train package. We advise our customers to check the quantity of the goods and the shipment conditions before taking delivery of the Products.

Title Retention Agreement

Walmec S.p.A. has the title on the supplied Products up to the integral payment of the due amount and of any other sum due by the Customer for any reason.

Risks and responsibility related to the use of the supplied Products are in charge of the customer starting from the time of the delivery.

Guarantee for Product Defects

The customer, at the time of the delivery, has the burden to check if the supplied Products match with the submitted order both in quantity and quality and if they are free from defects noticed with a quick view using the normal diligence.

Complaints for damages caused by the transport shall be sent directly to the carrier at the time of the receiving of the Product by specific note on the forwarding agent's delivery note, giving notice to Walmec S.p.A. within and not later than 8 (eight) days. Being expired said term, Products are considered received and accepted.

Walmec S.p.A. guarantees the conformity of the supplied Products according to what is reported in the catalogue. Products supplied are covered by 12 (twelve) months warranty period, starting from the delivery date, against construction and material defects. In any case the guarantee is not applicable if the customer is not able to prove having made a correct use, maintenance and preservation of the Products. Walmec S.p.A. denies any liability for damages to persons, animals and things due to an inaccurate and improper use of the Products.

Repairs

Shipments for repairs must be delivered carriage paid to Walmec premises located in via Trieste 10, Santa Lucia di Piave, Treviso, Italy, and will be sent back DDU charging the freight costs on the invoice. Repairs made during the warranty period will be sent back DDU.

Applicable Law and Jurisdiction

Any dispute arising in connection with the present contract shall be finally settled in front of the Treviso Court. This contract is governed by the Italian Law.
